Global Association for Research Methods and Data Science

Dr. Liu Awarded the Highest Data Scientist Certificate

On May 25 of 2018, Dr. Alex Liu, managing director of the Global Association for Research Methods and Data Science was awarded the highest data scientist professional certificate: data scientist thought leader.

In the past, Dr. Alex Liu worked as a research fellow for Stanford University, the IBM Research and the University of California at San Diego, while consulted for many well know organizations such as the United Nations and Ingram Micro. In recent years, Dr. Liu made good contribution to the definition of data science, and played leading roles in building data science eco systems, as a data science thought leader.

As the founder and a managing director for the Global Association for Research Methods and Data Science, Dr. Liu taught advanced analytics to Ph.D. Candidates in the University of Southern California and the University of California at Irvine from 2002 to 2011. Since 2010, he has worked as Chief Data Scientist for a few corporations including Retention Science, TRG iSky and Yapstone. Since 2013, Dr. Liu has worked as a Chief Data Scientist for IBM Analytics Services. In recent years, Dr. Liu devoted his time to building eco systems for data science and machine learning, as well as to developing multi-level machine intelligence. His recent publications include the Apache Spark Machine Learning Blueprints by Packt Publishing.
